Spring cleaning takes on a new importance this year. Cleaning **and** disinfecting your home is one way to help slow the spread of COVID-19.

Cleaning does not kill germs, but by removing them, it lowers their numbers and the risk of

spreading infection. If a surface may have gotten the virus on it from a person with or suspected to have COVID-19, the surface should be cleaned and disinfected. Disinfecting kills germs on surfaces.

## National Nurses Week

We are extremely thankful for our nurses and other healthcare workers over the last few months while they battle the coronavirus on the front line.

For National Nurses Week, we in Loudoun County are sending special thanks to the public health nurses who work here!

Nurses help keep the community safe by tracking outbreaks of communicable diseases - not just COVID-19, but also the flu, TB, and others. They also see patients in our health clinics to provide immunizations and other health services.

As we all continue to work through these difficult times, please keep our nurses and healthcare professionals in your thoughts.

## Loudoun Continues to Seek Monetary Donations for Personal Protective Equipment

Loudoun County is renewing its call for monetary donations to be used to purchase personal protective equipment (PPE) that can be distributed to long-term care facilities and other health care providers facing a critical need for PPE.

Monetary donations allow the county to use its buying power to purchase PPE in bulk to create a sustainable supply that can be provided to Loudoun-based agencies, including those caring for people who are most vulnerable to COVID-19, such as the elderly.

## Don't Put Off Urgent Medical Care

### Know the Signs of STROKE

#### B.E. F.A.S.T.

Determining when to go to the hospital or seek medical care can be a challenge, particularly during the COVID-19 pandemic. You may find yourself afraid to go, even when it's necessary. If you need emergency care, don't delay.

Now more than ever, it is important to keep yourself healthy. Keeping yourself healthy means addressing health problems as they arise. Getting urgent help when needed is especially important for strokes, heart attacks and life-threatening emergencies. Outcomes for these medical emergencies are tied to how quickly the patient receives care, so delaying getting treatment due to coronavirus fears can have serious consequences.

It has been reported that COVID-19 has caused strokes in younger people having mild coronavirus symptoms. See the attached photo to [know the signs of stroke](#).
